

# GrowVance™

## Vital Zn

Zinc solution chelated with ortho-ortho EDDHA, designed for use in most soil applied fertilizers.

### ACTIVE INGREDIENTS

- Total Nitrogen (N) ..... 4%  
4.0% Ammoniacal Nitrogen (N)
- Zinc (Zn) ..... 4.5%  
4.5% Chelated Zinc (Zn)

Derived from: aqua ammonia, zinc EDDHA and zinc EDTA.

### APPLICATION DIRECTIONS

- For use at planting starter fertilizer, side-dress or postemergence to prevent or correct zinc deficiency  
Apply 1-4 qt/A (1-2 qt/A is most common) alone or added to an existing liquid phosphorus-based in-furrow starter fertilizer program.

### COMPATIBILITY

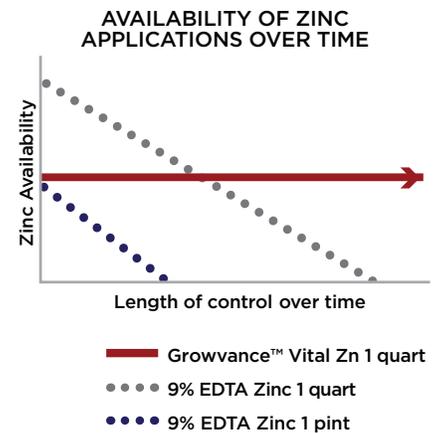

GrowVance™ Vital Zn can be blended with most primary, secondary, or micronutrients as well as crop protection products. Add GrowVance Vital Zn to liquid fertilizer and agitate lightly until mixed. In the absence of published information, check compatibility by performing a jar test prior to mixing.

### IMPROVED HANDLING CHARACTERISTICS

- GrowVance Vital Zn is a new formulation that contains an improved defoamer system to reduce foam formation when mixing with starter fertilizers.
- Starter fertilizers vary in their quality and level of impurities that can lead to precipitate formation. GrowVance Vital Zn contains a new compatibility aid to improve the compatibility and longevity of compatibility with a wider array of starter fertilizer options.

### FEATURES AND BENEFITS

- Increases length of time zinc is available to the plant.
- Allows zinc, phosphorus, and other micronutrients already present in the soil more available for plant uptake.
- Enhanced nutrient availability increases speed of emergence, overall plant health, and ultimately yield.

### CROPS

Corn, Soybeans, Dry Beans, Sugarbeets, Wheat, Barley, Sorghum, Sunflowers

PACKAGE SIZE | 250 gal
